B2E CONSULTING ENGINEERS, P.C. IS A SERVICE ORIENTED ENGINEERING FIRM BASED IN NORTHERN VIRGINIA

B2E CELEBRATES 20 YEARS IN BUSINESS

It is hard to believe it has been 20 years since B2E Consulting Engineers, P.C. was founded. Back in 1994, founder Bruce Beddow already had a great deal of Mechanical Engineering experience, having spent about 10 years working in mechanical engineering consulting in the U.S. and Europe. The company grew quickly and we added Electrical and Plumbing Engineers—including Mr. Bryan Turman who joined us in our second year and is still with us today.

We are very family-oriented here at B2E and wanted to do work that would support the development of the youth in our community. Designing the places where kids learn and play seemed like a great way to do that, so we focused on Mechanical, Electrical, and Plumbing (MEP) Engineering for schools & recreational facilities.

Over the years we built strong relationships with many municipal government agencies in DC/VA/MD. We are so thankful to our repeat clients who have chosen to work with us on multiple projects over the years.

At the end of 20 years in business, B2E is proud to be a regional leader in MEP for schools & recreation centers. Looking forward to the future, we will continue to focus on green and sustainable design. We believe it is important to foster sustainable resource use so that our young people can grow up with the same lifestyle we enjoy. To that end, we are designing new and innovative green facilities which use Geo-Thermal and Solar renewable technologies to minimize energy consumption and emissions. A bonus for our clients is that these clean air technologies also greatly reduce their electric bills and operating costs!

It has been an amazing 20 years, with many advances in technology. Our clients are aware that using available technology in innovative ways will optimize energy performance. We strive to simplify our systems to reduce maintenance and operating cost whenever possible. We are proud of our achievements in Net Zero Ready green building design. We look forward to the next 20!
